Mindanao is endowed with abundant water supply.

Now, Mindanao's "New Normal" with annual disasters

Now, Mindanao's environment is in a poor state.

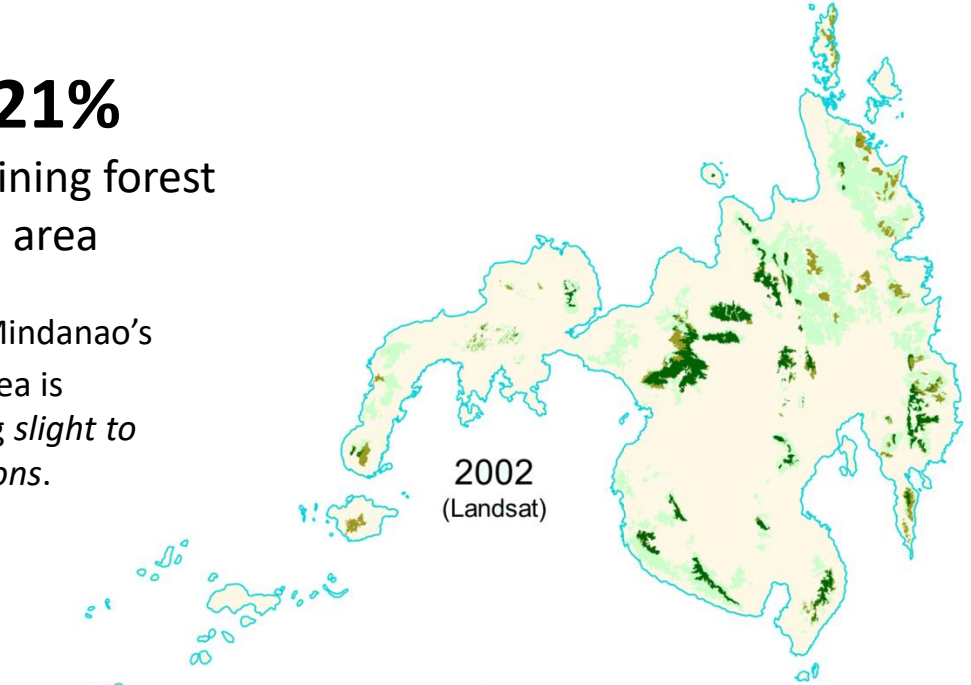

21%

remaining forest area

51% of Mindanao's total land area is experiencing *slight to severe erosions*.

Other human and economic activities that affected the environment:

- Increased community along riverbanks
- Mining activities
- Mangrove cutting in coastal areas
- Disposal of waste in water systems
- Quarrying
- Unregulated use of water
