

The Role of Social Science in Community - Based Conservation and Management

Angelita M. Cadelina

Social and natural scientist concerned in improving the quality of life of Negritos in Kangguhob, Mabinay, Negros Oriental.

Organizing POs from different communities . Natural leaders to select officers and committee members

Organizing Role – Organizing a demonstration activity to show how to mitigate rapid social movement from elevated areas by using discarded poles

Here is the river in Kalakuasan Palawan where German tourists usually swim. They usually swim on the other side of the river

The Batak are honest people, they leave alone the German tourists' stuff .e.g. camera , radio, shades etc. in this hut or elsewhere. They just go about their household tasks

They love to entertain , dance to the beat of this percussion instrument

Behaviorist Role – Rene Vendiola a naturalist turn around from a prolific hunter to conservationist driven by Pol Carino (natural / social science)
Convincing power

Apolinario B. Carino has been involved in numerous conservation endeavors dealing with community –based projects in Balinsasayaw , Mantikil, Ayungon, (NIR) and parts of Mindanao

Cost of viewing this caved- in river in Palawan is equivalent To the cost of going to a movie

Cost Benefit Analyst
Demo on Agro forestry technique

Cost Benefit Analyst

Protective Legislation Role

Protective Legislation Role

Solitary and Corporate Decision Making

The social science change agent share his/her own ideas to the group. The group members exchange ideas , for instance, how to address a forest regulation violation core

Thank you
